

About EBARA Group

EBARA has three core in-house companies: the Fluid Machinery & Systems Company, the Environmental Engineering Company, and the Precision Machinery Company. EBARA develops the business in each field. In addition to function of the headquarters, one of the primary roles of the Corporate is to create and foster new business, and now we are working on fuel cell systems as an incubation business. We are operating (developing) our business nationwide based on four districts including Haneda, Fujisawa, Sodegaura and Suzuka and sales offices. We also have our overseas representative offices, subsidiaries and affiliate companies in 17 countries and regions, and through global networking, our business expands in the global marketplace.
