

EBARA Group History

1912 to 1940s Building our foundations

1912 (Nov.)	Inokuty Type Machinery Office founded. Issey Hatakeyama was appointed general manager, under the supervision of Ariya Inokuty, a professor of Tokyo Imperial University.	1941 (Dec.)	New plant built in Kawasaki. The new plant began manufacturing machine tools in accordance with the Machine Tool Manufacturing Law.
1920 (May)	EBARA CORPORATION established. A plant was constructed in Minami-Shinagawa, Shinagawa-cho, Ebara-gun, Tokyo, marking the establishment of the Company, which assumed the responsibilities of the Inokuty Type Machinery Office and began the manufacturing of centrifugal pumps.	1945 (Apr.)	Haneda Plant damaged in war. All operations, except for a pump testing facility, fabrication and welding shop, and main building, deemed no longer functional. As a result, production was transferred to the Kawasaki Plant.
1938 (Apr.)	New plant built in Haneda, Kamata-ku, Tokyo. The Head Office and manufacturing operations shifted from Shinagawa to the new facility in Haneda.		

1950s to 1970s Meeting technological needs

1955 (Jan.)	The Haneda Plant was reopened to spearhead the Company's manufacturing operations.	1965 (Apr.)	The Fujisawa Plant was opened as the first facility in Japan to mass-produce standard pumps, and it took over the production of chillers from the Haneda Plant.
1956 (Jan.)	Ebara-Infilco Co., Ltd., was set up to manufacture and sell water treatment equipment.	1975 (Jan.)	EBARA's first overseas production facility, Ebara Indústrias Mecánicas e Comércio Ltda., was established in Brazil.
1964 (Apr.)	EBARA's first post-World War II overseas sales office was opened in Bangkok.	1975 (Nov.)	The Sodegaura Plant was opened to manufacture mainly compressors and turbines.
1964 (June)	Ebara Service Co., Ltd., was established to provide after-sales service for EBARA's products.	1979 (Dec.)	P.T. Ebara Indonesia was established in Indonesia to manufacture standard pumps in Southeast Asia.

1980s to 1990s Spreading our technology

1981 (Jan.)	Ebara International Corporation was established in the United States to provide a North American base for the pumps business.	1989 (Jan.)	Ebara Italia S.p.A. (currently, Ebara Pumps Europe S.p.A.) was established to manufacture stainless steel standard pumps.
1985 (Jan.)	EBARA realigned its production systems by integrating the Kawasaki Plant into the Fujisawa Plant.	1992 (Aug.)	EBARA QINGDAO CO., LTD., was founded in China as a center for pump production.
1987 (July)	A precision machining facility was opened at the Fujisawa Plant dedicated to the production of vacuum equipment for the semiconductor industry.	1994 (Oct.)	Ebara-Infilco Co., Ltd., was merged into the Company.

2000s and later Surpassing 100 years

2000 (Apr.)	Ebara Techno-serve Co., Ltd., was formed to combine sales and maintenance services for the standard pumps business.	2006 (May)	Ebara Machinery (China) Co., Ltd., was formed to serve as the manufacturing, sales, and service center for standard pumps in China.
2000 (Apr.)	New Elliott Corporation, a leading company in the compressors and turbines business, became a wholly owned subsidiary.	2009 (Apr.)	EBARA integrated its water treatment plant businesses into Ebara Engineering Service Co., Ltd.
2001 (June)	Ebara Kyushu Co., Ltd., established in Kumamoto Prefecture for producing CMP and other equipment, went into full operation.	2009 (Oct.)	EBARA integrated its environmental plant businesses into Ebara Environmental Plant Co., Ltd.
2002 (Apr.)	The compressors and turbines business was split off into a separate company, Elliott Ebara Turbomachinery Corporation, located in Chiba Prefecture.	2010 (Jan.)	The Futtsu Plant was newly established in Chiba Prefecture, and the functions of the former Haneda Plant were transferred there.
2002 (June)	The Executive Officer System was introduced.	2010 (Mar.)	EBARA, Mitsubishi Corporation, and JGC Corporation started a joint venture in the water business, Ebara Engineering Service Co., Ltd. (currently, Swing Corporation).
2002 (Sept.)	The chillers business was split off into a separate company, Ebara Refrigeration Equipment & Systems Co., Ltd.	2010 (Oct.)	Ebara Kyushu Co., Ltd., was merged into the Company.
2003 (May)	Ebara Great Pumps Co., Ltd., was established in China to manufacture and sell pumps in China for the oil and gas industries.	2012 (Apr.)	In a realignment of the pumps business, Ebara Technoserve Co., Ltd., Ebara Yoshikura Hydro-Tech Co., Ltd., and Ebara Environmental Technologies Hokkaido Co., Ltd., were merged.
2005 (Apr.)	An in-house company system was introduced with a corporate structure comprising a Corporate Sector for headquarters functions and three core companies: Fluid Machinery & Systems, Environmental Engineering, and Precision Machinery.	2012 (Nov.)	100th anniversary of the commencement of EBARA operations.
2005 (Aug.)	Ebara Boshan Pumps Co., Ltd. (currently, EBARA MACHINERY ZIBO CO., LTD.), was established in China to manufacture and sell large-scale, high-pressure pumps in China.
