Notice of Impact of Situation in Russia and Ukraine on Our Group Business

EBARA Corporation announces the following information of the current impact of the Russian and Ukrainian situation on our group's performance.

1. Our Group's Business in Russia and Ukraine

Our Group's business activities in Russia and Ukraine are mainly in the Fluid Machinery & Systems Company. However, revenue in the past five years to the same area was insignificant, accounting for less than 1% of the Group's total revenue.

2. Current Status

The volume of transactions in Russia and Ukraine is insignificant for the Group as a whole, and the impact on the Group's financial forecast for the fiscal year ending December 31, 2022 is immaterial at this time.

In addition, due to the situation in Russia and Ukraine, the prices of energy and raw materials are soaring, however, we will gradually take necessary measures, such as seeking optimal procurement methods.

We will continue to closely monitor the situation and take appropriate measures, mainly in the task force that has already been established. We will promptly announce any possible major impact on our business performances as circumstances change in the future.
